SUMMARY

I'm a software developer who is passionate about learning and sharing something new everyday to grow both as a software developer and as an individual.

EXPERIENCE

FRONTEND DEVELOPER (REMOTE, PART-TIME)
Dropright | 12.2020-02.2021

- Managed to convert Figma mockups into pixel-perfect responsive frontend pages based on Google's material design.
  - Used JS, React & Redux to program
  - Used Material UI library to style the frontend components

- Collaborated with a backend developer to make proper API calls from the frontend to the backend.
  - Used Insomnia to check backend nodes, and Axios to make HTTP requests.

FRONTEND DEVELOPMENT INTERN
Yetenek Kapısı | 2019

- Experienced working in a frontend development team with agile methodologies
  - Worked with a kanban board in Jira

- Created frontend components for the web page
  - Used React
